Artificial Intelligence and Automation Working Party

About this working party

The Artificial Intelligence and Automation Working Party considered how new technology will change the future role of life and health & care actuaries and will consider how actuarial practice needs to evolve.

This working party investigated how actuarial practice needs to evolve to make the best use of new AI and automation techniques, particularly in life and health/protection insurance including pricing and product design, reserving, ALM, capital management, and investment.

Chair: Atreyee Bhattacharyya

Established: 2019-2024
